UCEM undertakes thorough pre-employment screening as part of its recruitment process. ## Attachment – homeworking environment

UCEM is a **flexible employer** and flexibility is built into different places of work location. As such, it is reasonable to ask employees to adhere to some **general principles and ways of working**, in order to make sure flexibility offers value to everyone, including UCEM.

In addition, if all or part of your working week involves working at home, your home environment must meet certain conditions. Otherwise you will be required to work in the office at Horizons.

### General principles

- All employees regardless of place of work will be required to take an online Display Screen Equipment (DSE) assessment and repeat this at such intervals as may be instructed by the Facilities Management Team. The purpose of this is to look after your health and safety at work.
- All employees must adhere to UCEM IT Security and Data Protection policies in their place of work.
- All employees will be expected to be accessible to colleagues during their normal working hours and ensure their Outlook Calendars reflect the accurate place of work.
- All line managers will be expected to be accessible to their team and will be responsible for ensuring the performance of their team.

### Remote (Home) requirements and conditions

- Where your place of work involves working at home, you must have suitable conditions in which to work.
- As a minimum, your UK home location must be able to accommodate the UCEM technology and equipment. What this means in practice is that you must have sufficient space in which to house the technology and equipment safely and securely.
- In all cases, UCEM technology and equipment can only be handled and used by you, the employee. It must not be accessible to any other household member, at any time.
- When you are working remotely as part of the DSE assessment, you will be required to provide evidence that your working environment meets DSE requirements, such as providing a photo of your workstation setup.
- You must also provide a secure and reliable internet connection which allows you to work as effectively as if you were in Horizons, **including undertaking video and audio calls and connecting permanently to the VPN.**
- In the case of known broadband outage you should plan to work at Horizons or elsewhere – noting that elsewhere must still meet the place of work requirements. Should you be unable to do either of these options, you will be required to take holiday. In the event of unexpected outage, you should discuss with your line manager whether you need to find an alternative place of work or take holiday.
- For the avoidance of doubt, the provision of the required broadband, will be self-funded.
- It is expected that you will house technology and equipment at a suitable work desk, which gives you the space needed to work safely and confidentially. This space in your home must be away from other household users, such as space in a room which is not frequented by other household members.
- Your work environment must remain professional at all times. This means you must be able to work remotely without interruption from household members and noise, and your surroundings should mirror what an office environment would look like (clean/tidy, free of clutter and distractions).
- It is not appropriate to work from a sofa or other location which is not in keeping with presenting a professional work environment. Opting to use the blurring function on Teams/Zoom is not an acceptable workaround.
- If you do not have space to accommodate these requirements or your circumstances change, you are not permitted to work at any location other than Horizons.
